## Easy Do It Yourself Garage Floor Products

### The garage ain't just for the car anymore!

There are several great products on the market today for the garage floor. These products are designed to cover your stained cracked concrete, or protect your new concrete. By using these floor products you can create an attractive garage for parking or transform your garage into extra useable attractive functional space. Our featured flooring products are great for parking on, working on, or playing on.

Stop painting your garage floor! At first epoxy paints seem to be an inexpensive way to cover and protect your garage floor. However, time is money - for those of you who have saved labor and painted the garage floor yourself should agree, it's not worth it!! Painting your floor correctly requires several days of working with harsh chemicals, cleaning the concrete, then finally painting and waiting for it to dry. Then after all that work, six months later and it begins to peel, stain and look bad. Even a professional garage company can't guarantee the longevity of an epoxy painted floor.

We carry several products that install in just a few hours, and will keep your garage looking great for years to come. If you have any questions about products, or need help with your flooring project feel free to call our customer service department at 866-556-6324.

Our most popular flooring is the [G-Floor Roll](#) Out PVC Flooring - it is available in a variety of colors, sizes and patters and is our most economical floor covering. Made in the USA and comes with a 5 year manufacturer warranty. To install, all you have to do is simply clean the area, roll out your flooring and you're parking in your garage that same day. The tough PVC non-porous surface has been specially formulated to protect against oil, antifreeze, salt, and common contaminates found on garage and shop floors.

Another option we offer is our top of the line Interlocking Floor Tile by [Race Deck](#). There are several tile products on the market, but Race Deck is the leader - high quality, with patented hidden locking tab for a smooth tight seam that won't pop apart every time you drive on them. Garage Tiles give you the freedom to create patterns and color schemes in your garage. In addition, the Race Deck is a solid, tough PVC product with UV stabilizer which protects the tile from staining, or fading - this tile is made in the USA and comes with a 15 year manufacturer warranty.

# Elite Xpressions Ilc.

Authorized dealer of G-Floor and Flexi-Tile  
[www.elite-xpressions.com](http://www.elite-xpressions.com) and [www.flexitiles.com](http://www.flexitiles.com)

Maybe you are not looking for a rigid tile. Another great garage tile made from a flexible PVC material by Flexi-Tile. This tile is 20" x 20" and comes in a variety of patterns and colors. Flexi-Tile is very easy to install and maintain and comes with a 25 year manufacture warranty, the best in the market. For more details about this product please visit <http://www.flexitiles.com>

**Painted Floors:** If you have invested in a nice painted floor - we also have a few suggestions on how to protect the painted floor with some inexpensive parking mats. Hot tires is the nemesis of epoxy painted floors. you can have an attractive parking mat, thus protecting the paint from stains, exposure, and peeling.

We have our new Clear G-Floor Mat which can cover your entire painted floor, or just purchase enough to park on thus protecting the paint from hot tires. [Click Here](#) to views stock sizes and prices.

There is also the [Clean Park Parking Mats](#), which are designed to catches mud, slush and grime that falls off of your vehicle. The Clean Park<sup>®</sup> helps to keep your garage floor clean eliminating the problem of tracking mud and grime into your home. The Clean Park<sup>®</sup> garage car mat also helps your garage and home stay safe by keeping all of

your walk areas dry. The heavy -duty 20-mil vinyl, in conjunction with the raised plastic edges, holds gallons of liquid from spreading onto the garage floor. The specially engineered Snap-On edges are extremely durable, as well as fast and easy to install, without tools.
