

Garage Door INSULATION KIT

HELPS REDUCE RADIANT HEAT BUILDUP IN YOUR GARAGE!

Installation Instructions

**READ ALL INSTRUCTIONS
BEFORE STARTING!**

Materials Included in Kit:

- (4) 24" x 18' long rolls of reflective insulation*
- (1) 1 1/2" x 60 yard roll double sided tape
 - (1) Disposable knife
 - (1) Tape measure
- (5) Single-use alcohol cleansing wipes

Kit contains enough insulation to accommodate up to an 18' x 8' door. *

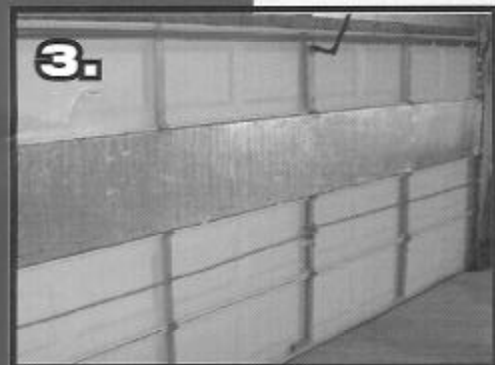

*Rolls can easily be cut down to fit smaller door sizes.

DIRECTIONS

STEP 1. Using alcohol wipes supplied, clean garage door panel framework where reflective insulation is to be applied. Make sure any debris is removed prior to applying double-sided tape.

STEP 2. Peel one side of double-sided tape and press firm & evenly to garage door panel framework. Cover all and all framework horizontally and vertically where insulation is to be applied. The double-sided tape should be applied at a temperature of 65°F - 100°F.

STEP 3. Measure and cut each roll of insulation to fit on the mounted strips of double-sided tape. Test each piece to ensure proper sizing for each panel. Remove the release liner from the tape and firmly press the reflective insulation against the adhesive working from side to side or top to bottom. Trim any excess insulation.

Note:
Please wear proper
safety equipment
